( ) and

[electronically] storing said metering data and said billing data electronically;

reporting said metering data and said billing data electronically.

- 7. (amended) The method in accordance with claim 1 wherein said calculating step calculates said billing data using generation, transmission and distribution costs of [electricity] said utility.
- 10. (amended) A method for remotely metering [electricity] usage of a utility at a consumer site and providing metering and billing data, the method comprising the steps of:

receiving [electricity] <u>utility</u> usage information remotely from [an electric] <u>a</u> <u>utility</u> meter;

5

calculating an electricity bill based on said usage information;
generating reports containing said usage information and [electricity] <u>a utility</u>
bill, wherein said reports <u>and said bill</u> are electronically accessible.

- 14. (amended) The method in accordance with claim 10 wherein said receiving step receives said usage information from said [electric method] <u>utility meter</u> by polling said [electric] <u>utility meter using an electronic communication medium, wherein said [electric] <u>utility meter is configured with a modem to connect to said communication medium.</u></u>
- 17. (amended) A [Metering and Billing Information Solution ("MBIS")] system for remotely metering [electricity] usage of a utility at a consumer site and for providing consumers with metering information, billing information, and electronic payment options, the system comprising:

5

[an electric] a utility meter for obtaining usage data on the amount of [electricity] said utility delivered to said customer site and transmitting said usage data;

receiving means for receiving said usage data transmitted by said [electric] utility meter;

10

15

calculating means for calculating [an electricity] <u>a utility</u> bill for the amount of [electricity] <u>utility</u> used based on usage data;

a computer database for storing said usage data and said [electricity] utility bill;

data retrieval means for retrieving said usage data and said [electricity] utility bill stored on said computer database; and

user interface means for presenting said usage data and said [electricity] <u>utility</u> bill to customers.

- 18. (amended) The system in accordance with claim 17 wherein said [electric] <u>utility</u> meter is configured with a modem for transmitting said data on an electronic data line.
- 19. (amended) The system in accordance with claim 17 wherein said user interface means further comprises a web site on the Internet for interactively providing said usage data and said [electricity] <u>utility</u> bill to consumers
